Notice Regarding the Impact of the Strait of Hormuz Situation on Raw Material Supply and Costs

Dear customer,

Due to the recent situation surrounding the Strait of Hormuz, impacts have become evident on both the supply and cost aspects of various raw materials.
In order to minimize any inconvenience to our customers, we are making every effort to ensure a stable supply of our products and are prioritizing continuity of supply as our highest objective.
However, under the current circumstances, we regret to inform you that it has become difficult to fully absorb certain cost increases. As a result, we may need to request your understanding regarding the application of a surcharge in some cases.
Details regarding applicable products and conditions will be provided individually by our sales representatives or authorized distributors. We sincerely appreciate your understanding and cooperation.

Keita NAGANO
Managing Executive Officer
General Manager, Powder & Paste Headquarters
